Optimized for XPS panels and EPS blocks

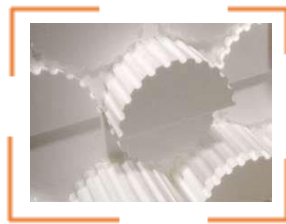

The hot wire cutting machines of the CUT2000S series cuts **standard sheets** of and **blocks** up to 1.250x1.050x3.000mm

The **4 independent axes** can be controlled in parallel or separately from each other. Cut 3D shapes with two differently sized contours such as cones, conical columns, profiles or air foils from EPS, XPS and EPP.

The machine has two machine units, a machine table and a machine working top made out of coated wood. This is a **single wire cutting machine** to cut:

**Cut EPS, XPS,
EPP Panels**

**Contour
cutting**

**Special
Packaging**

**Technical
cutting**

Highlights

The compact design, the **4 independent axes** and the machine table make this machine series first choice for any production to cut multiple panels or complete blocks. All machines are **ready for use** within 60 minutes.

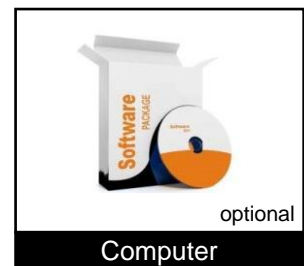

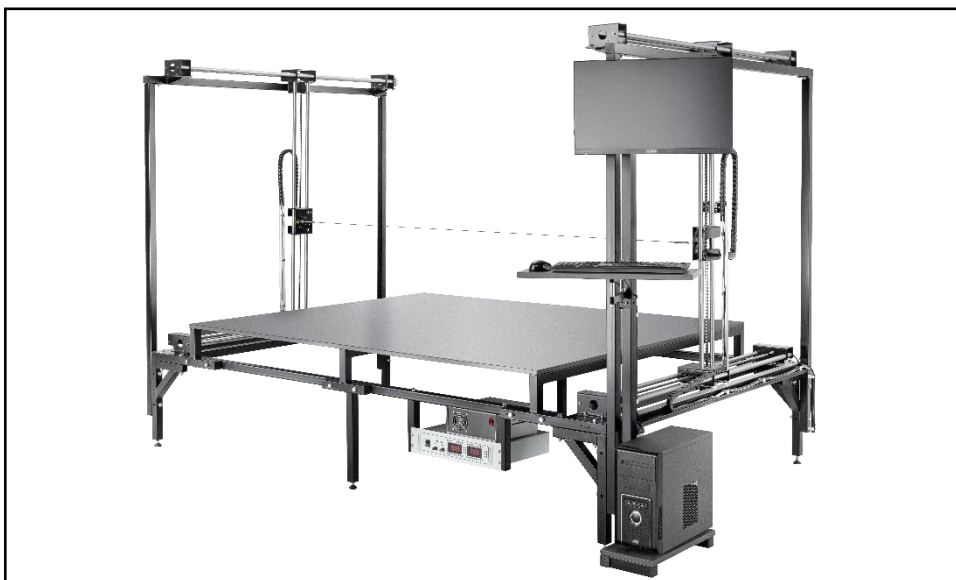

- ✓ Cut EPS, XPS, EPP up to a size of 1.250x1.050x3.000mm
- ✓ 4 independent axes for tapered cuts
