Cutting Roof Panels and more

With the professional machines from cnc-multitool, you too can inexpensively produce Roof insulation for flat and pitched roofs from polystyrene, **EPS, Neopor and XPS**. All you need is a machine, some space, the equipment and a few hours of practice. The rest is done by our **perfectly matched hardware and software**.

Highlights

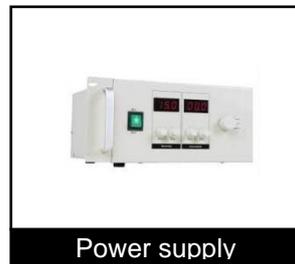

With up to **ten wires**, you can cut many panels and sloped panels in one go. Additionally, the independent vertical Y-axes allow the cutting of ridge or valley panels and ridge turrets from just one piece and with the single wire any 2D contour can be cut.

- ✓ Sturdy welded and painted steel construction - no aluminium
- ✓ Panel cutter with 10 wires
- ✓ Independent Y-axes
- ✓ Quick wire mount with springs
- ✓ Fully automatic lengthening function
- ✓ Create programs via simple parameter input
- ✓ Compatible to all CAD programs
- ✓ Data format: **DWG, DXF, PLT**

Content of delivery

Is there a cutting machine **for cutting slope roofs** with reserves for other applications? The CUT 2900SR - Roof is such a CNC Foam Cutting machine and despite the fact that it is Made in Germany it offers a large application range with a top price performance ratio.

The machine is **manufactured** by us, fully **tested** and packed. **Installation** on site can be carried out by you or by our technicians.

Technical Data

Features	CUT 2910SR	CUT 2920SR	CUT 2930SR
<i>Traveling forth / back (X)</i>	1.450 mm	2.050 mm	3.050 mm
<i>Traveling up / down (Y)</i>	1.300 mm	1.300 mm	1.300 mm
<i>Wire length (Z)</i>	1.450 mm	1.450 mm	1.450 mm
<i>Number of axes</i>	3	3	3
<i>Number of wires max.</i>	10	10	10
<i>Electrical connection</i>	AC 110V/220V, 50-60Hz	AC 110V/220V, 50-60Hz	AC 110V/220V, 50-60Hz
<i>Electrical consumption</i>	1.500 W	1.500 W	1.500 W
<i>Dimensions (L x B x H)</i>	220x200x200 cm	280x200x200 cm	380x200x200 cm
<i>Weight</i>	160kg	200kg	240kg
